

Activity sheet to determine height from ulna length

Activity:

The aim of this activity is to determine the height of yourself and a colleague through measuring your ulna length.

	Ulna length (centimetres)	Height (metres) based on ulna length	Recall height (metres)

Colleague's measurement			

Using the length of forearm (ulna) to determine height

Technique:

1. Ask the person to bend their arm (left side if possible), palm across chest, fingers pointing at the opposite shoulder.
2. Using a tape measure, measure the length in centimetres (cm) to the nearest 0.5cm between the point on the elbow (olecranon) and the mid-point of the prominent bone of the wrist (styloid process).
3. Use the measurement to convert ulna length (cm) into the patient's height (m)
